248 E County Line Road, P.O. Box 457, Hatboro, PA 19040

(800) 734-1000 or 215-675-8900 ext. 135

FIND OPENINGS: <https://delawarevalleyconcrete.com/careers/>

Production Manager

Responsibilities include safety inspections and inventory control of sites on as-needed by no less than monthly basis and plant staffing. If an overlapping shift is required, a relief shift must be scheduled also. Performance reviews must be completed in a timely manner. The monitoring of non-exempt personnel hours throughout the year, especially during the off season is required as is product inventory levels to ensure demand is met by having appropriate inventory available to balance sales. Daily AM and PM check in with plant managers and loader operators for possible problems and double check cement order and specialty products needed the next day.

Plant Manager

The Plant Manager will need to test concrete at the plant for slump, air content, concrete temperature, and unit weight for compliance with specifications as a normal part of our quality control plan. Responsibilities include managing the plant operations for profitability and quality. The highest priority is to get the first mixer truck loaded by its ticket time every day and then to assure that the mixer driver exits the yard in five minutes or less to assure on-time delivery to customers and cost-effective operation. Additionally, Plant Managers must ensure that the plant is being inspected for maintenance issues and lubricated and areas of concern are reported by email to Production Manager and V.P. of Operations. Certifications needed include ACI Concrete Field-Testing Technician Grade 1 Certification.

Ready Mix Drivers

Delivering ready mix concrete and other associated products to construction job sites from a DVC Plant. The driver may be called upon to work extensive overtime as weather and business conditions warrant.

Batch Operator

The Batch Operator will need to test concrete at the plant for slump, air content, concrete temperature, and unit weight for compliance with specifications as a normal part of our quality control plan.

Assistant Plant Manager/Loader Operator

Primary areas of responsibility include loader, hoppers and belt-delivery systems, monitor coarse and fine aggregate deliveries to meet yardage demands. Second areas include yard cleanliness, alternate manager, etc.
