# **Business Description**

Established in 2012 by Miguel and Toni Guerrero, G Technology is a full-service Electrical Contracting firm, specializing in Building Automation & Control Systems. At G Technology, we believe in delivering innovative solutions to our clients, and therefore, keep current on technological advancements. Our in-house, field trained engineering team ensures each project is accurately designed to specifications and fulfills all project requirements. With decades of industry experience under one roof, and a commitment to our clients, we are dedicated to exceeding your expectations.

Our mission is to forge long lasting relationships with our clients. Therefore, we are committed to delivering exceptional service and solutions, while maintaining high standards of safety, professionalism, quality workmanship, and cleanliness on every project.

G Technology was founded on the belief that success would be imminent if honesty and loyalty were never compromised. We are proud to say that these core values have substantiated our success in cultivating and sustaining excellent customer relations, as well as a dedicated workforce.
